

PROTECT OUR WATER. PROTECT OUR FUTURE.

Toxic waste from the Columbia Falls Aluminum Company Superfund site threatens our drinking water, our health, our land, and our economy.

SIGN THE PETITION YOU CAN MAKE A DIFFERENCE

Ask the EPA to fairly evaluate the cost-benefits of removing the toxic waste before issuing a final cleanup plan.

CLEANCFAC.ORG

COALITION for a
**CLEAN
CFAC**

The Coalition for a Clean CFAC is a growing group of Flathead valley residents, organizations and businesses who want the toxic waste removed and the CFAC Superfund site restored for the benefit of our community.

WHAT TO KNOW ABOUT THE PROPOSED PLAN

CFAC wrote the proposed cleanup plan for the EPA.

CFAC and Atlantic Richfield Company (ARCO) are responsible for cleanup costs.

CFAC said removing the waste was likely a permanent and effective solution, but that it was "too costly."

CFAC's parent company reported \$250 Billion in revenue in 2022.

About 40 toxic chemicals, including cyanide, fluoride, arsenic, and selenium, are buried on site putting the Flathead River at risk forever.

CFAC's proposed plan to build a slurry wall is "technically impracticable" according to experts and makes the site off-limits to most human uses.

From 1990 – 2009, CFAC regularly removed toxic waste safely by rail to a certified hazardous waste landfill. They can again!

HOW TO HELP

Sign the petition at
CLEANCFAC.ORG

Download the petition and collect written signatures.

We need as many signatures as possible before the EPA's tentative deadline for a final decision in late **March 2024**.
